	Subject	Technical Memorandum (Turbidity Monitoring) for NBH web posting

Hi Rose - happy holidays. Here's one more report for posting under Technical Documents. Since we'll be going out with an ESD in a few months, we should create another category under Technical Documents called "Lower Harbor CAD Cell" and have it be the first category listed (i.e., before "Environmental Monitoring"). The title listing for this report should be "Turbidity Monitoring of Navigational CAD Cell #2". Any questions give me a holler. Thanks!! Dave
